

LLOYD KENNETH S. RAMOS

Taguig City, Philippines | 0993 281 2702 | ramoslloydkenneth1@gmail.com
Portfolio: <https://lkramos-portfolio.vercel.app>
GitHub: <https://github.com/KewnsR>

PROFESSIONAL SUMMARY

Fourth-year Computer Science student passionate about software development, web technologies, and backend engineering. Experienced through academic and personal projects in developing full-stack applications using React, Django, Flask, PHP, and PostgreSQL. Strong problem-solving and analytical skills, with a commitment to continuous learning and building practical technology solutions.

EDUCATION

Bachelor of Science in Computer Science | Taguig City University | 2022 – Expected 2026
Dean Lister

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, React, Vite
Backend: Python, JavaScript, PHP, Django, Flask, Odoo ERP, REST API
Databases: PostgreSQL, Supabase, phpMyAdmin, Firebase
Tools: Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

- Application Developer Intern | Team Pacific Corporation | Mar 2026 – Jun 2026
- Contributed to enterprise application development using Python and Odoo ERP.
 - Implemented features that streamlined workflows and supported business process automation.
 - Participated in the development of AUTO-QA TPC, an AI-powered quality assurance platform for Integrated Circuit (IC) detection.
 - Assisted in frontend, backend development, system integration, testing, debugging, and performance optimization.
 - Collaborated with technical and business teams to deliver scalable enterprise solutions.
-

FEATURED PROJECTS

AI Scholarship Evaluation System (TCU-CEAA) - Thesis Project

Python, Django, React, PostgreSQL
Developed an AI-assisted scholarship evaluation platform that streamlines the assessment of scholarship applications through OCR, NLP, computer vision, and document verification technologies. Designed and implemented secure workflows for applicant screening, document validation, and evaluation management, helping improve efficiency, accuracy, and consistency in the scholarship review process.

ALUMNI TRACKER – Analytics Platform - Personal Project

React.js, JavaScript, Tailwind CSS, Chart.js, PapaParse, Vercel
Developed a web-based analytics platform for tracking and analyzing graduate employment data. Built interactive dashboards and data visualizations using Chart.js, processed datasets with PapaParse, and implemented role-based access control for administrators and viewers. Designed a responsive user interface with Tailwind CSS and deployed the application on Vercel to support accessible and scalable academic reporting.
